

Basic Detail Report

Breath Monitor

Date

1978

Primary Maker

Mary Ann Scherr

Materials

Sterling silver, bronze, electronics, and color coded LED display

Description

A sensor responds to the breath and electronically activates a LED display of green though yellow to red in ten levels of the breath odor. The amount of Hydro-carbons determine the levels of breath odor. The higher the level of hydro-carbons, the closer to red is displayed

Dimensions

2 1/2" x 3 1/2" x 3/4"
